WHY BUY?

SCREEN-PRINTABLE (ANALOG)

TEXTILE TRANSFER PAPERS

Analog textile transfer papers are screen-printed with vinyl and/or plastisol inks. Simply apply heat and follow peeling instructions for your specific application. Other inks and/or application methods must be qualified by the user. Powdered adhesives may be used in some applications. All of our screen-print transfer papers are stocked in the USA and can usually be shipped within 24-48 hours.

Transal® Premium

- Excellent dimensional stability
- Reliable feeding in all types of presses
- Excellent cold-peel release – 100%
- No residue in unprinted areas
- High gloss finish

WHY BUY?

LITHO-PRINTABLE (OFFSET) TEXTILE TRANSFER PAPER

Litho-printable (Offset) textile transfer papers are specialty coated papers that are used in decorating T-shirts and other fabrics, using a modified type of litho ink which is printed by using a lithographic printing process. The image is then screen-printed with a white opaque backing which is used to ensure a complete release. This is a **Cold-Peel** product.

TexiTran CP2 by Tullis Russell

*Tullis Russell's latest generation of **Cold-Peel** paper designed for litho (offset) printing applications*
